A 12-Week Performance-Driven GTM Framework for B2B Companies

Made with GAMMA

The Problem: Why B2B Revenue Leaks

Most B2B companies post content, run disconnected ads, and cold outreach without a system. No pipeline. No consistency. No attribution. The average B2B company leaves **60–80% of their LinkedIn pipeline potential untapped** — not from lack of effort, but lack of architecture.

No Qualified Pipeline

No consistent ICP-qualified pipeline from LinkedIn — just noise with no conversion.

Zero Revenue Attribution

Marketing spend with zero revenue attribution — money out, mystery in.

Cold Outreach Without Warmth

Cold outreach with no warm-up sequence — strangers asking for money.

No Differentiation

Zero positioning differentiation from competitors — invisible in a crowded feed.

Dragging Sales Cycles

Sales cycles that drag because trust was never built first — chasing instead of attracting.

Proof It Works

> "Within 1 month, we scaled to 850 organic followers with deeper audience engagement and 1 Million impressions on LinkedIn — converting into 50 paying B2B customers for a startup built from the ground up."

This is a **repeatable system** — not a one-time result.
